

GENESIS
ENGINEERING, INC

WASTEWATER SYSTEMS

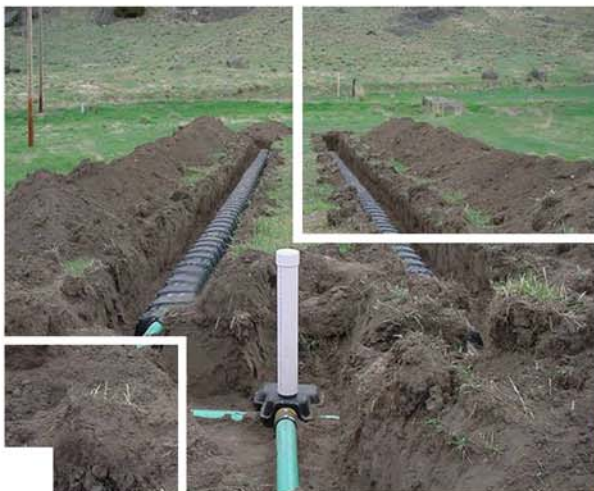

Genesis Engineering draws upon decades of experience to efficiently design and manage your wastewater project. We offer design expertise for the full scope of wastewater collection and treatment projects, ranging from on-site residential solutions to lift stations to flow demand forecasting, modeling, and design for large municipal collection systems. Our services also include evaluation and remediation of existing wastewater systems, as well as groundwater monitoring, and interfacing with reviewing agencies to reach the best possible solution for your project. Our core designs employ proven, up-to-date technology to maximize limited space, reduce environmental impact, and satisfy regulatory requirements, while saving you money.
